

MycoXpel™

SUPPORTS BROAD SPECTRUM DETOXIFICATION*

HIGHLIGHTS

Developed to cover many detoxification pathways relevant to damp building exposure.

Mycotoxins are detoxified through different liver pathways, each being unique in its structure.

Supports immunologic management of toxicants.

RECOMMENDED USE

Take one capsule twice daily with meals, or as directed by a health care practitioner.

BENEFITS*

Contains precursors and cofactors to support detoxification, including mycotoxins, bacterial VOCs, pesticides, and toxic metals.

Supports the innate immune system. Mold, mycotoxins, and bacterial endotoxins have a suppressive effect on the innate immune arm specifically.

Flavonoids modulate the expression and activation of cytokines to promote a healthy genetic expression of inflammation.

Supports the reproductive system, which sustains oxidative damage from mycotoxins, particularly in males.
